

Energy Control Inc (ECI) has provided innovative technology solutions in building automation since its inception in 1976. Over the last three decades the business strategy has placed emphasis on energy efficiency and system integration to improve facility performance.

INDUSTRY KNOWLEDGE

ECI's commitment to provide the most intuitive, new and proven solutions to customers has led to the formation of collaborative initiatives with other National Industry leaders. Today, ECI is working nationally to create environmental consciousness and promote "Smart Grid" technology and reduction in energy use. ECI employees participate in or serve on the boards of a large number of energy and technology organizations. ECI has experience in real-time enterprise energy management and employs Intelligent Building Professionals, a Certified Energy Auditor and Certified Energy Managers. ECI's president, Jack McGowan serves as chairman emeritus to the US Department of Energy sponsored GridWise Council. ECI is also actively involved in the Galvin Electricity Initiative serving as building champion.

AWARD WINNING INNOVATION

ECI delivers comprehensive energy services to address conservation and onsite generation. ECI is an award winning System Integrator with expertise in building automation systems; HVAC, DDC Systems, Surveillance, Access Control, Lighting Systems, and other special systems. ECI is able to provide building integration to allow these systems to work in concert with each other from one central control providing full-circle building automation. ECI employees and projects have been the recipient of countless awards for exceptional innovation, high-quality products, project implementation, and effective performance. ECI offers well-funded operations, professional management, and efficient back-office support for effective project implementation.

- *Building Intelligence*
- *Automated Demand Response (ADR) with open standards*
- *Onsite Energy Generation*
- *Energy Conservation*
- *Innovative Energy Storage*
- *All-inclusive Strategies*
- *One-point Accountability*
- *Customized Building Analytics*
- *Automated Systems Integration*
- *Design/Build Solutions*
- *Train, Maintain & Service*
