Albuquerque Academy

Albuquerque Academy was the first of its' kind integration project in New Mexico. The Academy's efforts in energy efficient operation and system integration have brought the school multiple awards and national recognition.

Albuquerque Academy was able to use operational cost savings to fund security measures which in turn provided savings for the campus.

USBuildersReview

The University of New Mexico

UNM received Energy User News' Project of the Year Award for their large scale operational Integration and Efficiency project.

ECI assisted UNM in acquiring grant funding to establish a Demand Response and Renewable Energy project. This project includes a solar array and energy storage techniques to lessen the campuses signature on the electric grid. The project received a Design/Build Award as well as the Association of Energy Engineers Regional Renewable Energy Project.

The Summit at Cottonwood

The combination of systems and communication cabling gave way to a new era of building control integration. At its' inception, the building contained the most high-tech monitoring center in the 50 states and has become a blueprint for intelligent building design.

**ENERGY USER NEWS
ENERGY ONLINE**

The Summit Design/Build project received a Bulldy Award for its' breadth of integration and technology solutions in system networking.

Alamogordo Public Schools

ASHRAE JOURNAL

The school district entered in to a ten-year performance contract with ECI - utilizing budget savings to help fund system upgrades. ECI has installed ground-source heat pumps, lighting retrofits, digital controls, security measures, networking capabilities, and IT infrastructure.
