

INTEGRATED SOLUTIONS

ENERGY CONTROL INC - AN ENERGY TECHNOLOGY COMPANY

www.energyctrl.com

Energy Control Inc. (ECI) works with a variety of premier suppliers for the equipment and integrated systems we offer. ECI is never sold by a supplier of equipment but actually researches businesses and their technology solutions before choosing lines of equipment to be dealers and integrators for. ECI has supply and distribution accounts with a large number of Industry leaders and represent multiple lines of products exclusively in order to offer our customers equipment and solutions to suit their needs and budgets. Our ability to deliver robust systems in a timely fashion combined with best value and our one of a kind support network allows ECI to be a market leader on any and all specialized systems and integrated environments.

LEED Certified PE • GeoExchange Installers • Energy Service Company • Certified Energy Manager

As technology trends change or widen, ECI has chose to add products and expertise to meet those needs. ECI takes pride in being a "full-circle" integrator with knowledge in system design, engineering, and the integration of specialized systems and technologies within a building or campus environment. ECI employs knowledgeable staff with LEED, IGSHPA, and solar certifications that can design, architect, build and troubleshoot all the systems that we implement for our customers. ECI consistently goes beyond the scope of work to ensure customer satisfaction with installed systems.

This dedication to customer satisfaction can be found in all aspects of ECI's operations.

- *building systems design*
- *energy services*
- *systems engineering*
- *installation & service*

ECI offers custom design-build Energy Management

& Building Intelligence solutions with eBiz.
