THE SUMMIT AT COTTONWOOD

Energy Control worked with the developer and design team on this highly integrated, secure, and energy efficient building.

- Fully Automated Building Functionality
- National recognition for Intelligent Building Integration

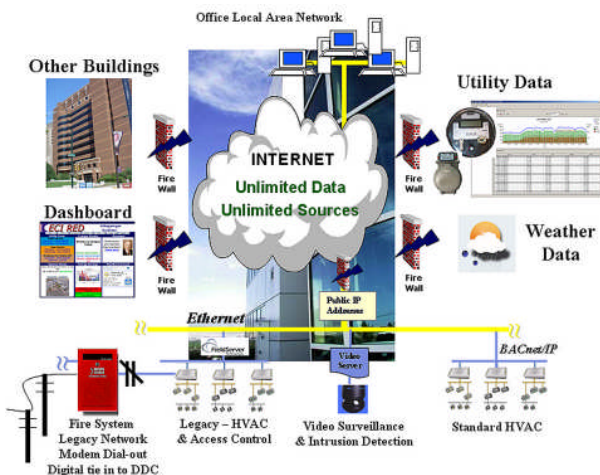

Summit at Cottonwood

The Summit Design/Build project received a Buidly Award for its' breadth of integration and technology solutions in system networking.

- Design/Build Project
- \$360,330 in Building Technology

The building was designed to provide the ultimate in comfort and security to tenants while giving cost efficient operation to the property owner.

The combination of systems and telecommunication cabling gave way to a new era of building control integration. At its' inception, the building contained the most high-tech monitoring center in the 50 states and has become a blueprint for intelligent building design.

Intelligent Building Technology

- Access Control with Keyless Entry
- Video Surveillance
- Fire Safety
- Internet Services
- Security & Monitoring Services
- High-speed Wireless
- Data Networking
